Sodhani Capital Limited (the “Company”) was incorporated on March 12, 2019 as a private limited company under the Companies Act, 2013, pursuant to a certificate of incorporation issued by Registrar of Companies, Central Registration Centre. Mr Rajesh Kumar Sodhani, Mrs Priya Sodhani, Mr Ankit Sodhani and Mr Ajit Shah were the initial subscribers of our Company. The Company was converted into a public limited company on August 22, 2023 as ‘Sodhani Capital Limited’, pursuant to a certificate of incorporation issued by Registrar of Companies, Jaipur, Rajasthan. The CIN of our Company is U65991RJ2019PLC064264. In the year 2021, the Company acquired the mutual fund distribution business (ARN transfer) of Mr. Rajesh Kumar Sodhani. The period between 2022 and 2025 witnessed further growth in both client base and assets under management (AUM). Client numbers grew from 4,000 in 2022 to over 7,000 by 2025, while AUM expanded from ₹200 crore to ₹500 crore. A key milestone in this growth phase was the company's transition from private to public limited status in 2023, enhancing its capital-raising capabilities and operational capacity. The company's success can be attributed to three key factors: consistent investment in operational infrastructure, strong focus on client education through initiatives like awareness seminars, and capable human talent.

(For Detailed information on our business, please refer to chapter titled “Our Business” beginning from page no. 101 of this draft prospectus.)

Summary of the industry in which our Company operates:

The Indian mutual fund distribution industry has witnessed remarkable growth in the past decade, primarily due to an increase in investor awareness, a shift towards financial literacy, and growing financial inclusion. The industry has transformed from a traditional, branch-based model to a more modern, technology-driven platform. Distribution is an essential component of the mutual fund ecosystem, as it connects investors to a variety of fund offerings. The distribution network includes independent financial advisors (IFAs), banks, wealth management firms, and increasingly, online platforms. Regulated by the Securities and Exchange Board of India (SEBI), the industry ensures transparency, fairness, and investor protection. SEBI’s initiatives, such as the implementation of direct plans and the introduction of new product categories, have strengthened the framework, allowing investors to make informed decisions while ensuring distributors get remunerated in a transparent manner. The Indian mutual fund distribution industry operates primarily on commission-based earnings, which are typically paid by asset management companies (AMCs) based on the assets under management (AUM) or the volume of business generated. With the rise of digital distribution platforms, commission structures have evolved, and technology has made it easier for investors to access funds, track investments, and make informed decisions with minimal intervention from intermediaries.

In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Offer including the merits and risks involved. Internal Risk Factors

Risks Relating to our Business

1. **All of our operating revenues are derived from our business of mutual fund distribution. Failure to attract potential customers mainly due to market volatility, regulatory compliance challenges, competitive pressures, technological adaptation needs, managerial effectiveness, and investor education gaps, may adversely affect our revenues, business, results of operations and prospects.**

All of our operating revenues are derived from our mutual fund distribution business, through commissions from asset management companies (AMCs). Failure to attract potential customers due to market volatility, regulatory compliance challenges (e.g., SEBI’s reduction in distributor commissions), competitive pressures from direct plans and fintech platforms, technological adaptation needs, managerial effectiveness, and investor education gaps may adversely affect our revenues, business, results of operations.

Effective management is essential in addressing these challenges. Strong leadership facilitates strategic decision-making and resource allocation while fostering robust client relationships. Conversely, ineffective management can lead to poor performance and a loss of competitive edge.

To mitigate the risks in our mutual fund distribution business, we can adopt several strategic approaches. Building a strong brand by providing customer service and transparent communication will foster client trust. Leveraging technology to streamline operations and improve client interactions is essential for efficiency and satisfaction. Additionally, nurturing strong client relationships through regular updates will enhance loyalty. Finally, expanding our distribution network into underserved markets will create new growth opportunities. By implementing these strategies, we can effectively manage risks and position ourselves for sustainable growth.

- 2. As an intermediary we have to comply with regulatory framework, by laws and guidelines. Also, we are subject to periodic inspections and any adverse action taken could affect our business and operations.**

We are subject to regular scrutiny and supervision by regulatory bodies, such as periodic inspections that may be conducted by these regulators. The requirements imposed by these regulators are designed to ensure the integrity of the financial markets and to protect investors interest. Any non-compliance with regulatory guidelines and directions may result in regulatory actions which includes issuance of administrative/warnings/deficiency letters, fines or sanctions imposed by these regulators and in some circumstances could lead to revocation of our license to function as mutual fund distributor company. Given the uncertainties and complexity of many of these regulatory actions, their outcome generally cannot be predicted with any reasonable degree of certainty. These and future examinations or proceedings by regulatory authorities may result in the imposition of penalties and/or sanctions, or issuance of negative reports or opinions, that could materially adversely affect our business, financial condition and results of operations.

- 3. We distribute, on a non-exclusive basis, financial products of third-party institutions i.e. Asset Management Company (AMC)'s. Failure to scale up our distribution business revenue and successfully cross-sell our products could adversely affect our results of operations and growth prospects.**

As distributor of financial products, we distribute mutual funds, on a non-exclusive basis, financial products of third-party institutions i.e. (AMC)'s. This exposes our business to following in risks.

- a. Non-Exclusive Basis: Our company does not have an exclusive tie-up with any particular financial institution. Hence, we do not have tie up with any specific AMC.
- b. Revenue Dependence on Distribution Business: Our company earns revenue from distributing these financial products. If we fail to expand our distribution business, we may struggle to increase revenues.

Hence, our company's success depends on increasing sales of third-party financial products and effectively cross-selling them to customers. Failure to do so could hurt our profitability and growth.

- 4. The premises of our Registered Office from where we are currently operating has been taken on lease by our company from our Promoter. In the event of termination or non-renewal of the leases, our business and revenues may be adversely affected**

The premises of our registered office situated on 1st Floor, C 373, C Block Vaishali Nagar, Jaipur-302021 is not owned by us and is taken on Lease basis from our promoter Mr. Rajesh Kumar Sodhani. The lease agreement for office premises is a composite agreement for lease of office premises as well as the infrastructure including furniture and fixtures, I.T. infrastructure etc. The lease agreement for office premises is dated November 07, 2024. The lease periods expire at regular intervals and we initiate the process of renewing the agreement. Further, we cannot assure that we will be able to continue the above arrangement on commercially acceptable / favorable terms in future. For further details, see section "Our Business" beginning on page 101 of this Draft Prospectus. If we are required to vacate the current premises', we would be required to make alternative arrangements for new offices and other infrastructure. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

- 5. Our success depends largely upon the services of our Promoter, Directors and other key managerial personnel and our ability to attract and retain them.**

We are dependent on our Promoter, Managing Director and Key Managerial Personnel for setting our strategic direction and managing our businesses. Our Promoter and our Directors possess the required regulatory qualifications for operating the business of mutual fund distribution and also, they have, over past years-build relations with clients and other persons who are connected with us. Accordingly, our Company's performance is dependent upon the services of our Promoter, our Managing Director, and other key managerial personnel. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company. In case any of our Promoter or Director or KMP disassociates with our company, we would face significant risk regarding the prospects of our business.

- 6. The competitive landscape of the mutual fund distribution sector presents significant challenges for our business.**

The mutual fund distribution sector is characterized by intense competition, with numerous players vying for market share. This competitive landscape can significantly impact our business in several ways, primarily by putting pressure on profit margins and complicating client acquisition and retention efforts. As more distributors enter the market, including banks and fintech platforms, they often leverage aggressive marketing strategies and advanced technology to attract clients. This heightened competition can lead to a price war, where distributors may feel compelled to lower fees or offer additional incentives to retain clients. Such practices can

erode our profit margins, making it challenging to sustain profitability while maintaining high-quality service standards. Moreover, the recent regulatory changes regarding trail commissions have further intensified competition among mutual fund distributors. This shift can lead to instability in our client base, as we may lose clients to competitors who offer better services or more attractive incentives. The pressure to differentiate ourselves in this competitive market also necessitates continuous innovation in our service offerings. We must invest in technology and enhance our client engagement strategies to provide personalized experiences that resonate with investors' evolving preferences. If we fail to adapt and meet these expectations, we risk losing clients to competitors who are more agile and responsive.

7. Risk Relating to Proposed Acquisition of Property

Our Company intends to utilize a portion of the Net Proceeds of the Issue towards acquisition of the property. The completion of such acquisition is contingent upon the successful completion of this Issue. In the event the Issue is not successful or if there is any shortfall in the Net Proceeds, the Company may be unable to consummate the said acquisition or may need to arrange alternate sources of financing, including internal accruals and/or borrowings, which could increase our leverage and have an adverse effect on our financial condition and cash flows. Further, there can be no assurance that the Company will be able to secure such alternative funding on commercially favorable terms or in a timely manner, which may impact our ability to implement our business plans.

8. Our valuation and financial performance may be impacted by market perceptions and economic conditions.

Our valuation and financial performance may be impacted by market perceptions and economic conditions, as reflected in key financial ratios. As of March 31, 2025, our price-to-earnings ratio at the offer price of Rs. [●] is [●] times, based on diluted EPS of Rs. 3.49 for FY 2025. Our weighted average return on net worth for the last three financial years (FY 2023-2025) was 38.73%, with 59.55% for FY 2023 alone. Fluctuations in these ratios due to market volatility or poor fund performance could adversely affect investor confidence and our share price post-listing. See 'Basis for Offer Price' on page 80 for details.

9. Lower than expected/anticipated performance of mutual funds distributed by us to customers can impact client trust and future business.

Lower than expected/anticipated performance of mutual funds distributed by us to customers can severely impact client trust and the future growth of a distribution business. When investors see their portfolios underperform, they may lose confidence in the distributor's expertise, leading to dissatisfaction and potential withdrawal of investments. This not only reduces assets under management (AUM) but also affects commission earnings and long-term client relationships. To mitigate these risks, we must conduct thorough due diligence, diversify recommendations, and maintain transparent communication to manage client expectations effectively.

10. We have experienced negative cash flows in the past.

Our cash flow from our operating, investing and financing activities has been negative in the past. Following are the details of our cash flow position for the financial year ended on March 31, 2025, March 31, 2024 and March 31, 2023 based on restated financial statements.

Our Company is in the process of registering its logo/trade mark “” with the Registrar of Trademark; and has made an application for it with the authority. Any infringement of our brand name or failure to get it registered may adversely affect our business. For the Financial Year 2023–24, our Company reported a Net Profit Margin of approximately 74.51%, including other income primarily derived from non-recurring capital gains. Excluding such other income, our operational Net Profit Margin stood at approximately 52.40%. These margins are significantly higher compared to certain listed peers in the financial services and advisory sector.

While the reported profitability reflects strong operational efficiency and cost control, there can be no assurance that such levels of performance will be sustained in the future. Factors such as intense competition, rising input costs, regulatory developments, and shifting market dynamics may adversely affect our profit margins.

Furthermore, the high profitability during the reported period was partially driven by certain non-recurring gains, which may not be continue in subsequent periods. In addition, deviations from industry benchmarks may lead to investor concerns regarding the consistency and comparability of our financial performance. Such perceptions, even if not indicative of underlying fundamentals, could negatively influence investor sentiment and the valuation of our Company.

21. The evolving regulatory landscape for mutual fund distributors, governed by the Securities and Exchange Board of India (SEBI), presents both challenges and opportunities for our business.

As regulations change, it is essential for us to stay compliant to avoid significant risks that could affect our operations and client trust. Non-compliance with SEBI regulations can result in penalties, suspension of business activities, or damage to our reputation, which can ultimately deter potential clients. The requirement for mutual fund distributors to obtain certification from the Association of Mutual Funds in India (AMFI) and adhere to a strict code of conduct emphasizes the need for professionalism and ethical practices in our operations. This regulatory framework aims to protect investors and ensure that distributors act in their best interests. Consequently, we must invest in continuous training and development for our team to ensure they are well-versed in the latest regulations and best practices.

Moreover, as SEBI monitors practices such as incentivizing distributors beyond permissible commissions, we must be cautious in our marketing strategies and avoid any actions that could be construed as non-compliant. This vigilance not only safeguards our business but also reinforces our commitment to ethical standards, enhancing our credibility in the eyes of clients.

22. Our ability to attract new customers is dependent upon various factors including our reputation and our ability to maintain a high level of service quality.

In the realm of mutual fund distribution, our company faces significant risks that directly impact our ability to attract new customers. Central to this challenge is our reputation, which serves as a cornerstone of trust in the financial services industry. Any lapses in service quality or ethical conduct can lead to reputational damage, making potential clients hesitant to engage with us. Given the industry’s history of mis-selling and inadequate customer service, it is crucial that we establish and maintain a strong reputation for integrity and reliability.

Moreover, our success is heavily reliant on delivering a consistently high level of service quality. In a competitive market where numerous distributors vie for clients’ attention, providing exceptional customer experiences is essential for differentiation. Clients today are not only looking for investment options but also for trustworthy partners who can guide them through their financial journeys. If we fail to meet their expectations in terms of responsiveness, transparency, and personalized advice, we risk losing them to competitors who may offer superior service.

Additionally, the regulatory environment in which we operate requires us to stay vigilant and compliant with evolving laws and guidelines. Non-compliance can lead to legal repercussions and further tarnish our reputation, making it imperative that we prioritize ethical practices in all client interactions.

To mitigate these risks, we must invest in ongoing training for our team to ensure they are well-versed in both market trends and regulatory requirements. By fostering a culture of continuous improvement and client-centric service, we can build lasting relationships with our customers and enhance our reputation as a trusted mutual fund distributor. Ultimately, our ability to attract new clients hinges on our unwavering commitment to service excellence and ethical standards in all aspects of our business.

23. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We are governed by various laws and regulations for our business and operations. We are required and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Statutory Approvals” on page 195 of this Draft Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

24. The overall performance of mutual funds is influenced by fluctuations in the financial markets. Economic conditions, government policies, and investor sentiment can lead to significant changes in market value, affecting returns on investments, which may directly impact on our business operations.

Market risk is a fundamental concern for mutual fund investors, as it encompasses the potential for fluctuations in the financial markets that can significantly impact the performance of mutual funds. This risk arises from various external factors, including economic conditions, government policies, and investor sentiment, all of which can lead to substantial changes in market value. For instance, during periods of economic downturn or instability, investor confidence may wane, resulting in widespread selling pressure that depresses asset prices across the board. Such scenarios highlight the systematic nature of market risk; it affects all investments within the market regardless of the underlying fundamentals of individual securities.

The implications of market risk are particularly pronounced for equity mutual funds, which are directly tied to stock market performance. When market conditions are unfavorable, the net asset value (NAV) of these funds can decline sharply, leading to losses for investors even if the companies within the fund’s portfolio remain fundamentally sound. Historical events, such as the global financial crisis of 2008, serve as stark reminders of how quickly market dynamics can shift, causing widespread declines in investment values without any specific fault of the companies involved. Moreover, mutual funds that invest in fixed income securities are also susceptible to market risk, particularly through interest rate fluctuations. Rising interest rates can diminish the value of existing bonds held within a fund’s portfolio, thereby affecting overall returns. Additionally, sociopolitical events—such as elections or geopolitical tensions—can further exacerbate market volatility and investor uncertainty.

Diversification is a key strategy to reduce this risk. By investing in a variety of mutual funds that span different asset classes—such as equities, bonds, and commodities—investors can spread their risk across various sectors and securities. This approach helps to cushion the impact of any single underperforming investment on the overall portfolio, as losses in one area may be offset by gains in another.

25. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

Our company has not identified any alternate source of funding regarding the objects of the Offer as detailed on page 70 of this Draft Prospectus. In case there is a delay in raising funds from the proposed public issue, there may be a delay in implementation of the objects that can potentially impact our growth plans. Since the company has not identified any alternate funding sources, it is fully dependent on the proposed IPO, any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

26. We depend on the accuracy and completeness of information about clients for our business. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business.

Our business is dependent on the accuracy and completeness of information about clients that we have to incorporate during the KYC process. Our company relies on detailed financial and personal information about our clients to assess risks, provide suitable financial products, and comply with regulatory requirements. This information includes credit history, financial statements, investment objectives, risk tolerance, and other relevant details. Any misrepresentation, errors in or incompleteness of such information from the clients could adversely affect our business.

To mitigate these risks, our company will have to ensure robust verification processes, data validation systems, and due diligence checks to ensure the accuracy and completeness of our client information.

27. As the industry embraces digital transformation, distributors must adapt to new technologies and platforms. Failing to keep pace with technological advancements can result in operational inefficiencies and lost business opportunities

The technological challenges faced by mutual fund distributors can significantly impact our business operations and overall competitiveness in the market. As the industry increasingly embraces digital transformation, it becomes essential for us to adapt to new technologies and platforms. Failing to keep pace with these advancements can lead to operational inefficiencies, which may hinder our ability to serve clients effectively and respond to their needs promptly. One of the primary effects of not embracing technology is the potential for increased manual processes, which can result in slower transaction times and a less efficient client onboarding experience. In a market where investors expect quick and seamless interactions, any delays can lead to dissatisfaction and lost business opportunities. For instance, if we do not implement digital onboarding solutions or automated systems, we risk alienating tech-savvy clients who prefer the convenience of online services. Moreover, the rise of robo-advisors and automated investment platforms presents a significant challenge. These technologies offer low-cost, efficient alternatives to traditional distribution models, allowing investors to access investment advice without human intervention. If we fail to integrate similar technological solutions into our offerings, we may struggle to compete against larger firms that can leverage their resources to provide advanced digital services at lower costs.

Additionally, cybersecurity risks associated with increased reliance on technology can pose threats to our operations and client data. Any data breaches or failures in our digital systems could lead to significant reputational damage and loss of client trust. Therefore, investing in robust cybersecurity measures is essential to protect both our business and our clients' sensitive information.

28. Our company faces certain risks related to our distribution business including a reduction in commission paid to us which may have an adverse effect on our business, financial condition, cash flows, results of operations and prospects.

All of our operating revenues are derived from our mutual fund distribution business, through commissions from asset management companies (AMCs). This commission is a key source of our revenue, and any reduction in it could negatively impact on our company's financial performance. The risk of commission reduction stems from the following points:

- a. **Regulatory Changes:** Government or regulatory bodies may introduce caps or restrictions on commissions to protect investors, reducing the company's earnings.
- b. **Market Competition:** Increased competition from other distributors or digital platforms may force companies to accept lower commission rates to remain competitive.
- c. **Changes in Third-Party Policies:** Financial institutions may decide to reduce commissions to cut costs, affecting the distributor's revenue.
- d. **Shift to Direct Investment Channels:** More investors are opting for direct investments in mutual funds and other products, bypassing distributors and reducing commission-based income.

29. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency.

Our company intends to use Net Proceeds from the Fresh Issue towards the objects of the Offer as detailed on page 70 of this Draft Prospectus. The funding requirement and deployment of the Net Proceeds mentioned as a part of the Objects of the Fresh Issue are based on current circumstances of our business, prevailing market conditions, and are subject to changes. The estimates for the proposed expenditure are based on several variables, a significant variation in any one or a combination of which could have an adverse effect. Furthermore, the deployment of funds has not been appraised by any bank or financial institution. Our company operates in a competitive and dynamic industry and we may have to revise our funding requirements and deployment from time to time on account of various factors beyond our control. Hence, the investors would have to rely upon management estimates regarding the proposed deployment of Net Proceeds.

30. Credit risk -for debt funds, there is a risk that issuers of securities may default on their obligations, leading to potential losses for investors. This risk is particularly pronounced in funds that invest heavily in corporate bonds. This risk can impact our business and result of operation of our business.

Credit risk significantly impacts our mutual fund distribution business, particularly concerning debt funds that invest in lower-rated corporate bonds. This risk arises from the possibility that issuers may default on their obligations, leading to potential losses for investors. As we distribute these funds, it is crucial to communicate the inherent risks to our clients effectively. If a fund experiences

defaults or downgrades, it can lead to a decline in its net asset value (NAV), which may result in investor dissatisfaction and increased redemption requests.

During periods of economic uncertainty, the likelihood of defaults can rise, making investors more cautious about credit risk funds. This heightened concern can affect our ability to attract new clients and retain existing ones, as investors may seek safer alternatives or avoid debt funds altogether. Additionally, if our funds are perceived as high-risk due to their credit profiles, it could damage our reputation and hinder our competitive positioning in the market.

To address these challenges, we must emphasize the importance of diversification within our debt fund offerings and highlight the expertise of fund managers in selecting and managing credit risk securities. By showcasing how we actively monitor credit quality and adjust portfolios based on market conditions, we can reassure investors about our commitment to managing credit risk effectively.

Moreover, educating investors about the potential for higher returns associated with credit risk funds—while also being transparent about the risks involved—will be essential in fostering trust and confidence in our distribution services. By proactively managing credit risk and maintaining open communication with our clients, we can navigate these challenges and strengthen our position in the mutual fund distribution landscape.

31. Lack of investor awareness poses a significant challenge for our mutual fund distribution business, as many potential investors may not fully understand mutual funds or the associated risks. This knowledge gap can lead to misaligned expectations and investment choices that do not suit their financial goals, ultimately affecting client satisfaction and retention.

When investors lack a clear understanding of mutual funds, they may make uninformed decisions, such as investing in products that do not align with their risk tolerance or financial objectives. This can result in disappointment when their investments underperform, leading to increased redemption requests. Such behavior not only impacts the net asset value (NAV) of the funds we distribute but also creates a negative perception of our services, as clients may blame us for their poor investment outcomes. Additionally, the lack of awareness can make it challenging for us to attract new clients. Many individuals may be hesitant to invest in mutual funds due to misconceptions or a general lack of knowledge about how these products work. If we fail to effectively educate potential investors about the benefits and mechanics of mutual funds, we risk missing out on a substantial market opportunity.

To address this issue, it is crucial for us to implement comprehensive investor education initiatives. By conducting workshops, seminars, and awareness campaigns, we can bridge the knowledge gap and empower investors to make informed decisions. Leveraging technology through online platforms and social media can further enhance our outreach efforts, allowing us to engage with a broader audience.

Moreover, personalized financial planning services can help us tailor investment strategies to individual clients' needs and goals, fostering trust and long-term relationships. By actively promoting financial literacy and awareness around mutual funds, we can not only improve client satisfaction but also strengthen our position in the competitive landscape of mutual fund distribution. Ultimately, addressing the lack of investor awareness is essential for driving growth and ensuring the sustainability of our business.

32. Interest Rate Risk: Changes in interest rates can negatively affect bond prices held within mutual funds, especially for fixed-income securities. Rising interest rates typically lead to a decline in the value of existing bonds.

Interest rate risk is a crucial factor that can significantly impact our mutual fund distribution business, particularly concerning debt funds that invest in fixed-income securities. This risk arises from the inverse relationship between interest rates and bond prices; when interest rates rise, the value of existing bonds typically declines. For our clients invested in these funds, this can lead to decreased net asset values (NAVs), resulting in potential financial losses and dissatisfaction.

During periods of rising interest rates, investors may become more cautious about investing in debt funds, fearing further declines in bond prices. This shift in sentiment can lead to increased redemption requests as investors seek to minimize their losses. If a substantial number of clients decide to exit their investments simultaneously, it could strain our funds' liquidity and force us to sell assets at unfavorable prices, exacerbating losses and negatively impacting the fund's overall performance.

Moreover, the perception of risk associated with debt funds can influence our ability to attract new clients. If investors perceive these funds as too risky due to interest rate fluctuations, they may opt for safer alternatives, such as cash or short-term investments. This behavior can hinder our growth and market share in the mutual fund distribution space.

To mitigate these challenges, we must educate our clients about interest rate risk and its implications for their investments. By providing insights into how interest rates affect bond prices and emphasizing the importance of diversification within their portfolios, we can help clients make informed decisions. Additionally, promoting strategies such as investing in floating-rate securities or short-duration funds can offer clients more stability during periods of rising interest rates.

33. A cyber-security breach could adversely affect our operations

Our business is depended on various IT and electronic delivery mediums. Also, we have existing IT infrastructure and also propose to further expand our IT infrastructures. Any cyber breach or malware attack on our IT infrastructure can affect the normal productivity of our business.

34. Our Promoters have interests in our Company, in addition to their normal remuneration or benefits and reimbursement of expenses incurred.

Our Promoters have interests in our Company that are in addition to reimbursement of expenses and normal remuneration. Our Promoters may be deemed to be interested to the extent of Equity Shares held by them, as well as to the extent of any dividends, bonuses, other distributions on such Equity Shares or rental income received from our Company for the immovable property rented by them to our Company. Our Promoter, Mr. Rajesh Kumar Sodhani have rented the property to our Company, which is being used as the Registered Office of our Company and as such the Promoter may be considered to be interested to the extent of the rental fee payable by our Company. For further details of such interests, please see "Our Management", "Our Promoters and Promoter Group" and "Restated Financial Statements" beginning on pages 125, 137 and 148 respectively of this Draft Prospectus.

35. Our Company has not taken any seperate insurance coverage for the office premises. Only insurance taken by us is regarding the vehicle asset owned by us.

Our Company has not taken any seperate insurance coverage for the office premises. The insurance of our office premises is covered by the owner of the property and is included in the rent agreement signed by us with the owner of the property. We believe that the insurance taken by the owner is sufficient to cover our risk. For details of our insurance cover, please see "Our Business" beginning on page 101 of this Draft Prospectus.

36. Increased competition for skilled employees and salary increases for our employees may reduce our profit margin.

The Indian job market is facing heightened competition for skilled employees, fueled by sustained economic growth. This is resulting in a rapid increase in wages. To attract and retain qualified personnel, our company may need to increase employee compensation, which could reduce profit margins and negatively impact our operational results.

37. Our inability to manage growth could disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new products portfolio. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial, and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values, and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition, and adversely affect our results of operations.

38. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page 180 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

39. Major fraud, lapses of internal control or failures on part of the employees could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

40. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the Offer, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold majority of the equity share capital of the company. As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company.

In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

41. Conflict of interest may arise due to common promoters between the issuer company and the promoter group company.

Conflict of interest may arise due to common promoters between the Issuer Company and the Promoter Group company namely Sodhani Academy of Fintech Enablers Limited. While both the companies operate in different business verticals, but owing to common promoters there might be conflict of interest in future due to attention being devoted to the promoter group company.

42. Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics.

43. Our ability to pay any dividends will depend upon future earnings, financial condition and cash flows.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section titled "Dividend Policy" on page 145 of the Draft Prospectus.

44. Our future fund requirements, in the form of further Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further Issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

45. Our Business is exposed to frequent regulatory changes

Our business is exposed to frequent regulatory changes that may be proposed or implemented by regulatory bodies. We operate in a highly regulated environment, which is subject to change, and existing and new laws, regulations and government policies affecting the sectors in which we operate could adversely affect our business, financial condition and results of operations. We are subject to a variety of financial services regulation in the jurisdictions where we operate, including, the SEBI Act or directions issued by AMFI

or Reserve Bank of India, as applicable. We believe that significant regulatory changes in our industry are likely to continue, which is likely to subject industry participants to additional and generally more stringent regulations. The requirements imposed by the regulators are designed to ensure the integrity of the financial markets and to protect investors and other third parties who deal with us. Consequently, these regulations often serve to limit our activities and/or increase our costs. We may also be adversely affected by changes in the interpretation or enforcement of existing laws and rules by various governmental authorities and self-regulatory organisations.

46. We are required to incur high Operational Costs

Running a mutual fund distribution business involves various expenses, including marketing, technology adoption, employee salaries, and compliance costs. As commissions shrink, covering these operational costs becomes a challenge, especially for small-scale distributors who lack the financial backing of large institutions.

47. We have to devote dedicated efforts for Client Retention

With the ease of online investing, investors frequently switch between platforms and distributors based on returns, services, and convenience. Retaining clients requires consistent engagement, personalized services, and regular portfolio reviews. High churn rates can significantly impact an MFD's recurring income.

48. We are directly affected by any Economic Slowdown or Market volatility

During economic downturns, disposable incomes decline, leading to reduced investments in mutual funds. Investors prioritize liquidity and cut down on discretionary investments. This directly affects the earnings of MFDs, making it difficult to sustain their business in challenging economic conditions.

49. We may not be able to identify suitable locations for expansion and also our expansion into new regions and markets may present increased risks due to our unfamiliarity with the areas in which we propose to locate.

The growth of our business depends on the pace of expansion of our presence and network, which requires us to continually identify suitable and available locations for growth. If we are not able to expand our business in a cost effective and profitable manner or otherwise manage the growth effectively, our business, results of operations, financial condition and prospects may be materially and adversely affected.

50. Our revenues from distribution and sale of financial products are dependent on our sustained ability to increase our AuM as well as on the performance of the funds that we distribute.

We earn distribution commission income from asset management companies for our mutual fund distribution business. The mutual fund products distributed to our clients constitute a significant part of our AuM and revenue. If the asset management companies reduce the total expense ratio due to regulatory changes, then they may reduce our distribution commission income which would impact our revenues and results of operations. The willingness of investors to make investments in asset classes is contingent on its ability to generate returns, in line with or in excess of client expectations. Market conditions, economic volatility or changing financial environment may render the asset classes or products we offer less attractive to investors.

Risks Relating to the Issue and the Equity Shares

51. After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the Lead Manager and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;

- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

52. The Equity Shares of our Company will be listed on the SME platform of the BSE Limited and would be traded in lot size. The investors might face risk of liquidity.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. The Equity Shares of our Company will be listed on the SME platform of the BSE Limited and would be traded in lot size. The investors might face risk of liquidity incase there are not substantial buyers and sellers to trade in the Equity shares of our Company.

53. The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

We have applied to BSE to use its name as the Stock Exchange in this offer document for listing our shares on the BSE- SME. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the BSE-SME. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

55. Foreign investors may be restricted in their ability to purchase or sell Equity Shares.

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

56. The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

57. Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

- 58. Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.**

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects' investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

- 59. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.**

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 60. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

- 61. The deployment of funds raised through this Offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.**

Since the Offer size is less than ₹5,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Offer. The deployment of these funds raised through this Offer, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Fresh Offer proceeds could adversely affect our financials. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Offer Proceeds.

- 62. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.**

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

- 63. Any variation in the utilization of the Net Proceeds of the Offer as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.**

We propose to utilize the Net Proceeds for objects as mentioned in chapter titled "*Objects of the Offer*". For further details of the proposed objects of the Offer, please see chapter titled "*Objects of the Offer*" beginning on page 70 of this Draft Prospectus. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds from the Offer as disclosed in this Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all.

Any delay or inability in obtaining such Shareholders approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

64. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.

The Offer Price of the Equity Shares will be determined by our Company and Selling Shareholders in consultation with the Lead Manager, and through Fixed Price Process. This price will be based on numerous factors, as described under “*Basis for Offer Price*” beginning on page 80 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

65. Our Company will not receive any proceeds from the Offer for Sale.

The Offer includes an Offer for Sale of up to 4,10,000 Equity Shares, in the aggregate, by the Selling Shareholders. Our Company will not receive any proceeds of the Offer for Sale by the Selling Shareholders. However, in the event that the Offer is withdrawn or not completed for any reason whatsoever, all the Offer related expenses will be exclusively borne by our Company. The expenses of the Selling Shareholders will, at the outset, be borne by our Company and the Selling Shareholders will reimburse our Company for such expenses incurred by our Company on behalf of the Selling Shareholders, in relation to the Offer, upon successful completion of the Offer in the manner as prescribed under applicable law and agreed amongst the Company and the Selling Shareholders. For further information, please see “*Object of the Offer*” on page 70 of this Draft Prospectus.

66. The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter.

67. There is no guarantee that the Equity Shares offered pursuant to the Offer will be listed on the BSE SME in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares offered pursuant to the Offer will not be granted until after the Equity Shares have been offered and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

External Risks

68. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

69. A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

70. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to **"Key Industry Regulations and Policies"** on page 114 of this Draft Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and

implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

71. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

72. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

73. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

74. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

75. Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

76. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

77. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any significant change in India’s economic policies could disrupt business and economic conditions in India generally and the Company’s business in particular.

78. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

79. Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

80. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

81. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

82. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

83. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

SIGNIFICANT ACCOUNTING POLICIES

(All amounts in Indian Rupees in Lakhs, unless otherwise stated)

1. Disclosure of Accounting Policies

- a) Company is engaged in the business of financial services, specializing in the distribution of mutual fund products. It serves as a trusted intermediary between Asset Management Companies (AMCs) and investors.
- b) The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as specified in the Company (Accounting Standards) Rules 2014, the provisions of the Companies Act, 2013. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use. The management evaluates all recently issued or revised accounting standards on an on-going basis. Where changes are made in presentation, the comparative figures of the previous year are regrouped and re-arranged accordingly.
- c) The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

2. Basis of Preparation

The Restated Standalone Summary Statement of Assets and Liabilities of the Company as at 31 March 2025, 31 March 2024, and 31 March, 2023 and the related Restated Standalone Summary Statement of Profit and Loss and Restated Standalone Summary Statement of Cash Flows for the period / years ended 31 March 2025, 31 March 2024, and 31 March, 2023 and annexures thereto (herein collectively referred to as 'Restated Standalone Summary Financial Information') have been compiled by the management from the respective Audited Standalone Financial Statements of the Company for the period ended 31 March 2025, 31 March 2024, and 31 March, 2023 which, were originally approved by the Board of Directors of the Company at that relevant time.

These Standalone Financial Statements were prepared using the historical cost convention on an accrual basis. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

The Restated Standalone Summary Financial Information have been prepared specifically for the inclusion in the offer document to be filed by the Company with the Securities and Exchange Board of India ('SEBI') in connection with the proposed initial public offering of the Company.

The Restated Standalone Summary Financial Information are presented in Indian rupees (in Lakhs), unless otherwise stated. This Restated Standalone Summary Financial Information was reviewed and approved by the Board of Directors of the Company on 12th August, 2025.

3. Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles ('Indian GAAP') requires management to make estimates and assumptions that affect the reported amount of assets, liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results may differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

4. Operating Cycle

Based on the nature of its activities, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

5. Cash Flow Statement

Cash flows are reported using indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from regular revenue

generating, financing and investing activities of the Company is segregated. Cash and cash equivalents in the balance sheet comprise cash at bank, cash/cheques in hand and FDRs & margin money with bank.

6. Net profit or loss for the period, prior period items and changes in accounting policies

- a) Net Profit or loss for the period and prior period items are shown separately in the Statement of Profit & Loss wherever applicable.
- b) Prior period items are income or expenses which arise in the current period as a result of errors or omissions in the preparation of the financial statements of one or more prior periods.
- c) Extraordinary items are income or expenses that arise from events or transactions that are clearly distinct from the ordinary activities of the enterprise and, therefore, are not expected to recur frequently or regularly.

7. Income Recognition

Revenue is recognized to the extent there is reasonable certainty of its ultimate realisation and it can be reliably measured.

- a) The entire direct income is Commission and fees income from distribution of mutual fund products.
- b) Dividend income is recognized when the right to receive the same is established.
- c) Interest income is recognized on a time proportion basis.
- d) Gains / losses on sale of investments are recognized on the trade date.

8. Depreciation / Amortization

Depreciation on fixed assets is provided on written down basis at the rates and in the manner prescribed in Schedule II of the Companies Act, 2013 except for certain assets.

9. Property, Plant & Equipment

Depreciation on all property, plant & equipment is provided on straight line value method as per the useful life prescribed under schedule II of Companies Act 2013.

10. Accounting for Investments

Investments, being long term in nature, are valued at cost of acquisition. Adjustment for increase/decrease in the value of investments, if any, will be accounted for on realization of the investments.

11. Borrowing Cost

Borrowing costs that are directly attributable to the acquisition, construction or production of the qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are charged to the statement of profit and loss.

12. Employee Benefits

Liability in respect of retirement benefits is provided and/or funded and charged to Profit & loss A/c as follows:

- a) Provision for contribution to defined contribution plan, recognized as expenses during the year as under.
- b) Gratuity is accounted for on actuarial valuation basis.
- c) The obligation for Leave Encashment recognized, provided for and paid on yearly basis.

13. Earnings per share

Basic and Diluted Earning per Share are computed in accordance with AS 20-Earning Per Share. Basic earnings per Equity Share is computed by dividing net profit after tax by the weighted average number of Equity Shares outstanding during the year. The Diluted Earning per Share is computed using the weighted average number of Equity Shares and Diluted Potential Equity Shares outstanding during the year.

14. Income Tax

Income tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

Current tax expense is recognised on an annual basis under the taxes payable method, based on the estimated tax liability computed after taking credit for allowances and exemption in accordance with Indian Income-tax Act, 1961. In case of matters under appeal due to disallowance or otherwise, full provision is made when the said liabilities are accepted by the Company.

In accordance with the Accounting Standard on “Accounting for Taxes on Income” (AS-22), the deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets.

Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonable / virtually certain (as the case may be) to be realised.

15. Provisions, Contingent Liabilities and Contingent Assets

In accordance with the Accounting Standard on “Provisions, Contingent Liabilities and Contingent Assets” (AS-29), Provisions comprise liabilities of uncertain timing or amount. Provisions are recognised when the Company recognises that it has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reasonable estimate can be made.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements.

14. Income Tax

Income tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

Current tax expense is recognised on an annual basis under the taxes payable method, based on the estimated tax liability computed after taking credit for allowances and exemption in accordance with Indian Income-tax Act, 1961. In case of matters under appeal due to disallowance or otherwise, full provision is made when the said liabilities are accepted by the Company.

In accordance with the Accounting Standard on "Accounting for Taxes on Income" (AS-22), the deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively

enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets.

Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonable / virtually certain (as the case may be) to be realised.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements.

Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Individual Investors who applies for minimum application size would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Individual Investors who applies for minimum application size through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public offer closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Offer closure to listing is proposed to be reduced to three working days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-offer LM will be required to compensate the concerned investor.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Offer Opening Date. Our Company and the Selling Shareholders will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with April 20, 2022 Circular.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI SAST Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
