- Nifty closed at 25,355.25, down by 120.85 points, witnessing mild profit booking from the recent highs. The index continues to hold above the breakout zone and all major EMAs, suggesting broader strength remains intact. However, RSI has slipped to sideways zone, reflecting a short-term profit booking and change in momentum, while ADX at 21.69 indicates a consolidative trend phase.
- Price is hovering near the upper channel resistance with multiple small-bodied candles, showing indecision. As long as Nifty sustains above 25,200, the structure remains positive with potential upside towards 25,600–25,800, while breach below 25,200 could drag it towards the 24,800 demand zone.

- Bank Nifty closed at 56,956, down by 257 points, forming a small red candle after a tight range consolidation. Despite holding above the breakout zone, the index is showing early signs of fatigue as RSI continues to form lower highs, hinting at bearish divergence, while still sustaining above 56 on the oscillator. ADX remains subdued at 23.50, indicating a lack of trend strength.
- Price structure shows Bank Nifty hovering near upper channel resistance and flattening out, signaling possible time-wise correction or mild pullback. Support lies at 56,500–56,300 zone, while upside will only resume convincingly above 57,300, else expect range-bound action.
