

Nifty50

Closing price	R1	R2	S1	S2
23,995.70	24,200	24,400	23,800	23,500

- Nifty 50 opened at 24,049 — gap-down from Apr 27's close of 24,092 — hit a brief high of 24,181 early in the session, then sold off sharply to a low of 23,957, closing at 23,995 — down -97 points (-0.40%).
- Nifty 50 has now closed below the 50 EMA and is sitting right on top of the 20 EMA the last dynamic support standing between current price and the critical horizontal band at 23,800.
- The structure is increasingly resembling a lower high formation — each rally attempt peaks lower than the last.
- Nifty 50 RSI at 50.50 is literally sitting on the knife-edge of the 50 neutral line — this is the most critical RSI reading in the entire recovery from the April lows.

Bank Nifty

Closing price	R1	R2	S1	S2
55,400.35	56,000	56,700	54,800	54,000

- Bank Nifty is where the real damage happened today — opening at 55,862, touching a high of only 56,138 before collapsing to a low of 55,263, closing at 55,400 — down a sharp -863.95 points (-1.54%).
- This is the worst single-day loss since the recovery rally began in early April and is a significant bearish development.
- Bank Nifty's close at 55,400 is the most structurally damaging development of the day. The index has now closed below all four EMAs in a single session, completely surrendering the EMA reclaim that was building over the past two weeks.

Intraday call

Stock Name	Buy In Range	SL	TGT
CROMPTON	270-271	264	280

Crompton Greaves is showing a bullish reversal attempt with price breaking above a descending trendline and forming higher lows, indicating improving structure. The stock has reclaimed short-term moving averages, signaling a shift in momentum from bearish to bullish. RSI is rising into bullish territory, reflecting strengthening momentum. Volume participation has picked up on the breakout, supporting buying interest. Intraday bias remains positive, with price action favoring continuation if momentum sustains.

Delivery call

Stock Name	Buy At	SL	TGT
NHPC	85	80 (closing basis)	92

NHPC is showing a bullish breakout attempt from a falling channel, supported by strong upward price action and improving participation. Price has moved above key moving averages, indicating a shift toward trend strength and potential reversal. The formation of higher lows suggests building bullish structure. RSI is trending in bullish territory, reflecting momentum pickup. Volume expansion during upward moves supports buying interest, making the setup favorable for a positional upside continuation.
